

Assignment - 01 :- Flowchart

1. check positive number :-

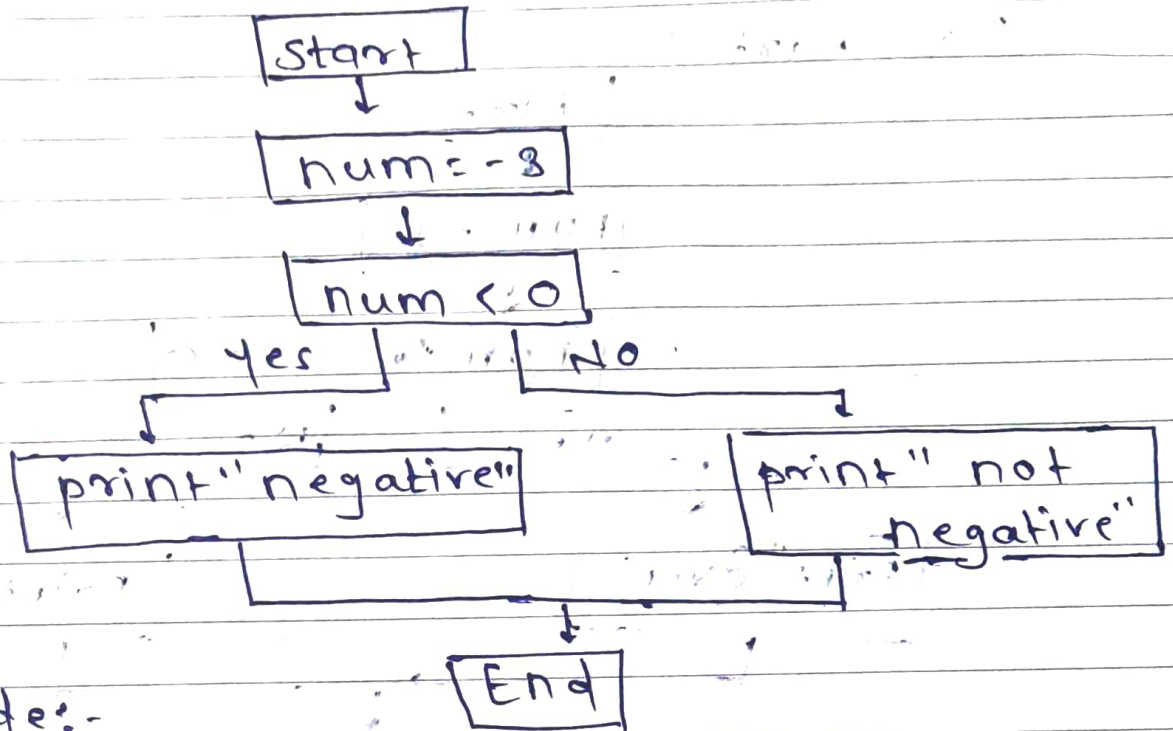

Flow chart :-

code :-

```
public class check positive {  
    public static void main (String[]  
        arg)  
    {  
        int number = 3 ;  
        if (number > 0) {  
            sout (" number is positive")  
        }  
        else {  
            sout (" Not positive") ;  
        }  
    }  
}
```

2. check negative number

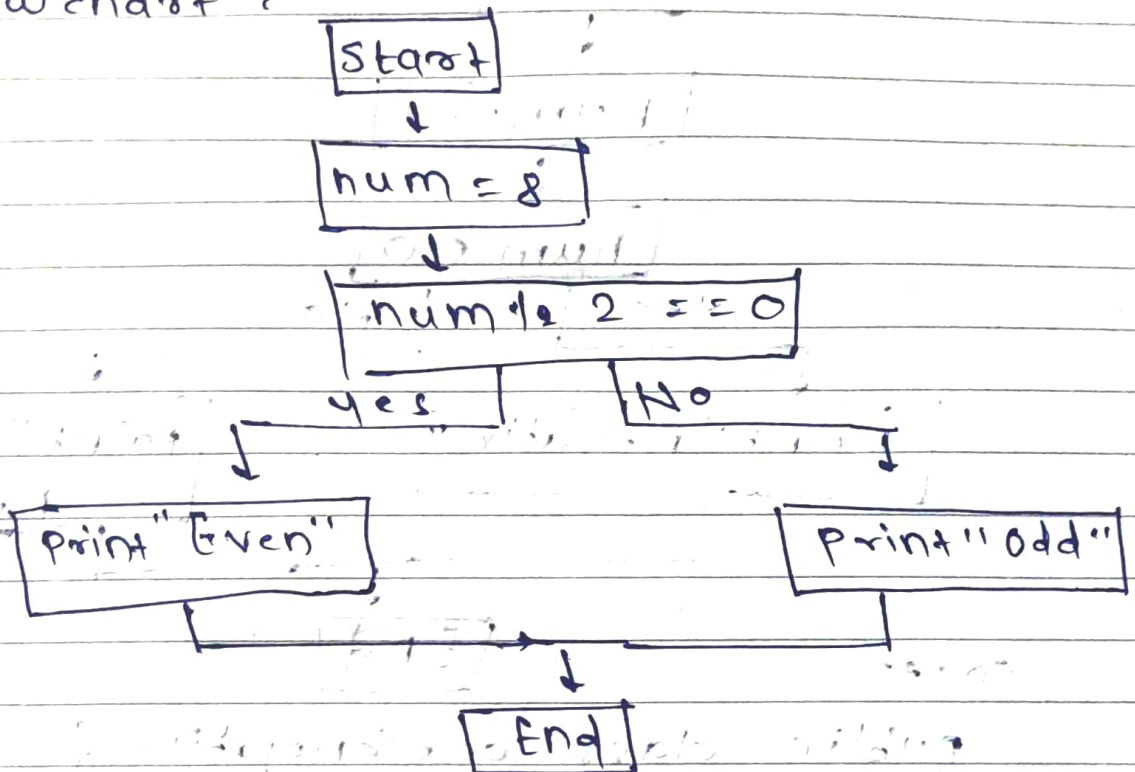

code:-

```

public class checknegative {
    public static void main(String[] args) {
        int num = -3;
        if (num < 0) {
            sout("negative number")
        } else {
            sout("No negative");
        }
    }
}
  
```

3. check odd or even number.

Flowchart :-

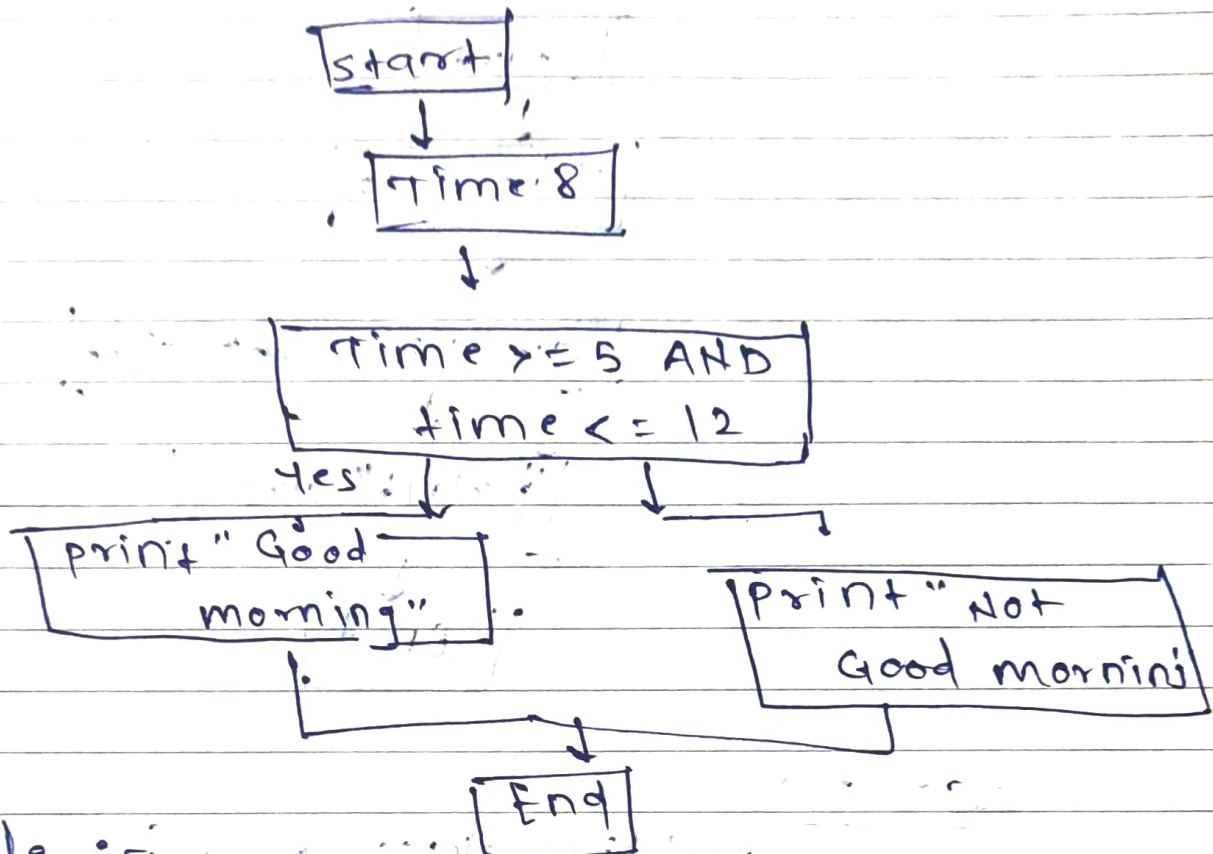

code:-

```

public class checkEvenodd {
    public class static void main
    (String[] args) {
        int num = 8;
        if (num % 2 == 0) {
            sout ("the number is even");
        } else {
            sout ("number is odd");
        }
    }
}
  
```

04. Display Good Morning Based on time

Flowchart :-

Code :-

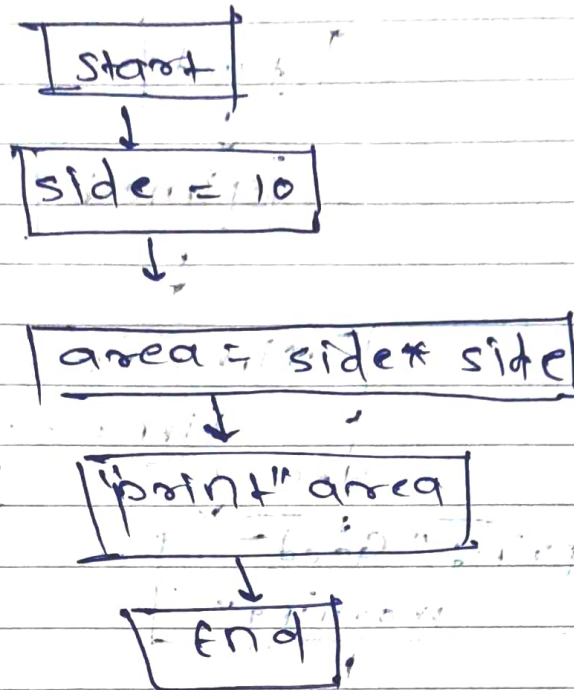

```

public class GoodMorning {
    public static void main(
        String args[]) {
        int time = 8;
        if (time >= 5 && time <= 12) {
            sout ("Good morning");
        } else {
            sout (" not Good morning");
        }
    }
}

```

5. print Area of Square

Flow chart :-

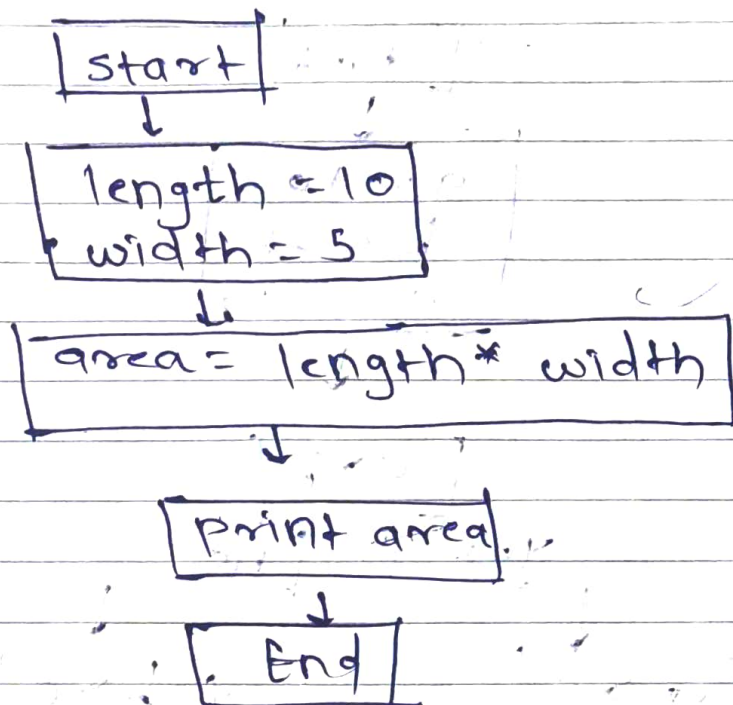

code :-

```

public class Area {
    public static void main(
        String[] args) {
        int side = 10;
        int area = side * side;
        sout ("Area of Square = " + Area)
    }
}
  
```

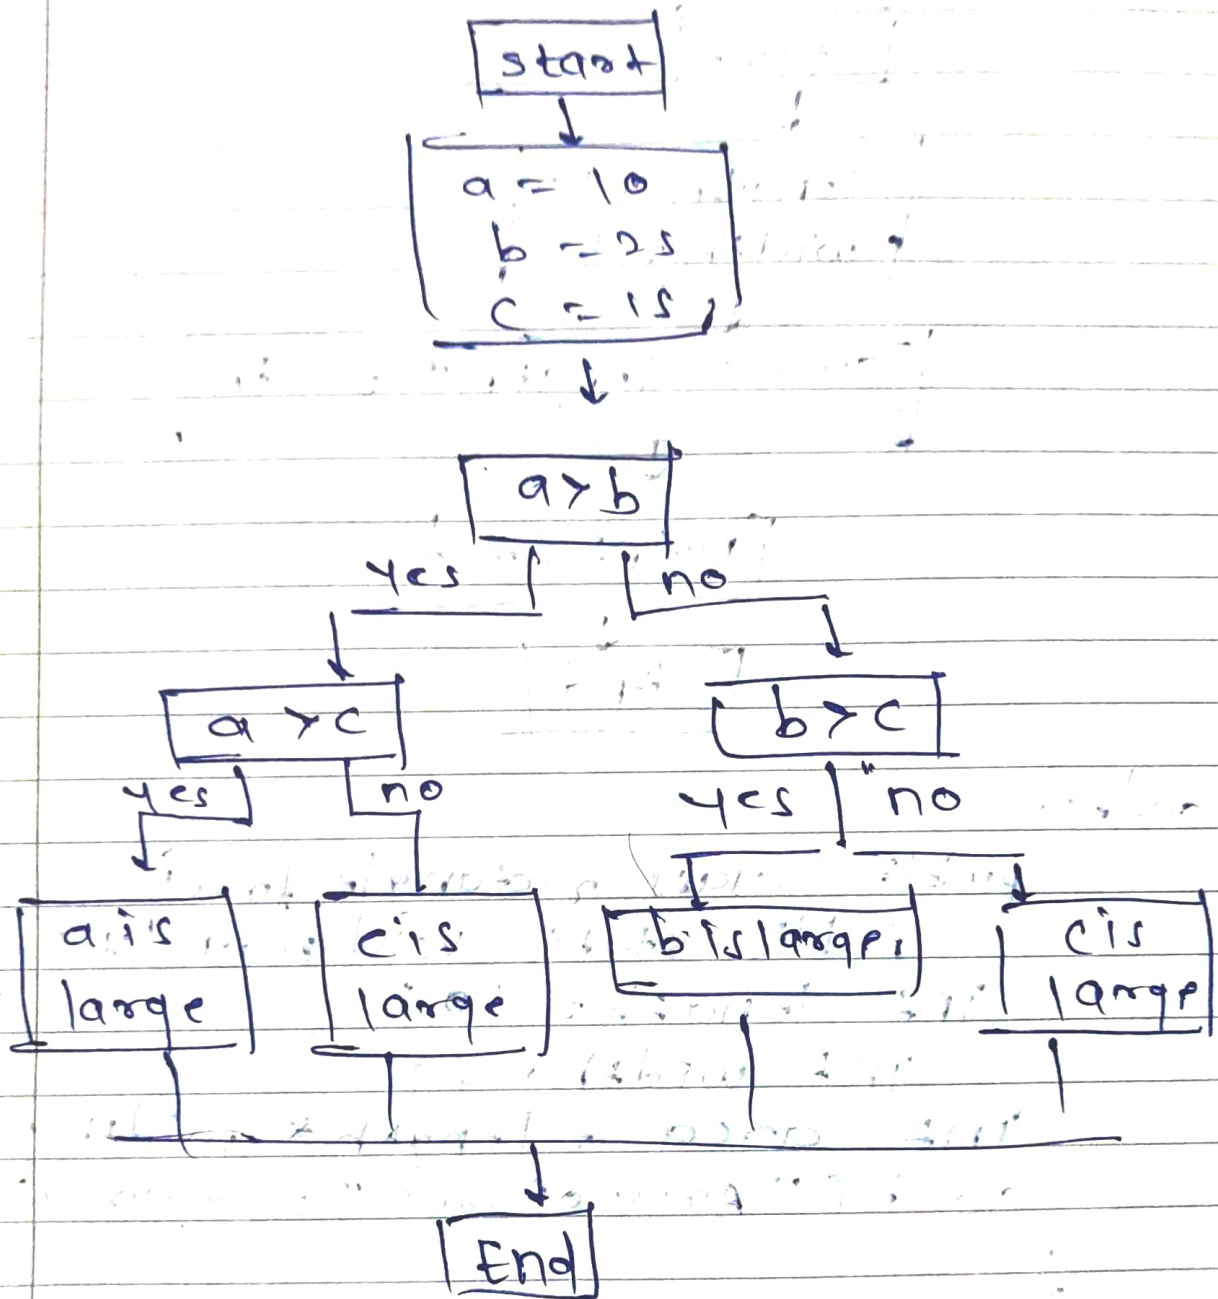

6. Area of Rectangle :-

code:-

```
public class rectangleArea {  
    public static void main (String[] args)  
    {  
        int length = 10;  
        int width = 5;  
        int area = length * width;  
        sout ("Area of rec" + area);  
    }  
}
```

7. Find the largest three numbers:-

code:-

```
public class largenum {  
    public static void main (  
        String [] args) {  
        int a = 10;  
        int b = 25;  
        int c = 15;  
  
        if (a > b) {  
            if (a > c) {  
                sout ("Large number" + a);  
            }  
        }  
        else {  
            if (b > c) {  
                sout ("large num" + b);  
            }  
            else {  
                sout ("large num" + c);  
            }  
        }  
    }  
}
```
